PROFILE

Aspiring Software Developer skilled in Python, Django, and React.js, with expertise in building scalable full-stack web applications. Passionate about designing clean, user-friendly interfaces and developing efficient backend logic. Experienced in integrating APIs and leveraging Figma for prototyping and layout design. Eager to contribute to impactful projects and continuously learn modern development practices.

SKILLS

- **Programming Languages:** Python, JavaScript, C (familiar)
- **Frameworks & Libraries:** Django, Django REST Framework, React.js, Bootstrap, Tailwind CSS
- **Web Development:** HTML, CSS, JSON
- **Database Management:** SQLite, MySQL (basic)
- **Tools:** Git, GitHub, Postman, VS Code
- **Version Control & Deployment:** GitHub Pages, Render/Netlify
- **Design & Prototyping:** Figma (UI Design, Wireframing, Layout Planning)
- **Soft Skills:** Communication, Collaboration, Attention to Detail, Problem-Solving

RECENT PROJECTS

Ecommerce Website - NERB

[\[Watch Demo\]](#)

Tech Stack: Django, HTML, CSS, JavaScript

A cosmetics-focused e-commerce platform with product listings, dynamic cart, and checkout system.

- Implemented user authentication and role-based access for admin and customers.
- Built and deployed complete cart system with dynamic item updates and checkout handling.
- Designed and developed backend logic using Django models and views.
- Ensured responsive UI using Bootstrap for mobile-friendly experience.

Career Recommendation System - MARG

[\[Watch Demo\]](#)

Tech Stack: Django, Python (Machine Learning), HTML, CSS, JavaScript

An AI-powered web application designed to recommend personalized career paths for students and professionals.

- Developed machine learning models to analyze user inputs (skills, interests, preferences) and generate tailored career suggestions.
- Integrated a chatbot using Gemini API capable of processing text prompts and images to provide interactive career guidance.
- Built Django-based backend to manage user data, ML predictions, and API integration for real-time responses.
- Created a responsive frontend interface for smooth interaction and accessibility.
- Designed and implemented a database schema to store user details, career recommendations, and chatbot interactions.
- Implemented search and filter functionality for easy exploration of career options.

Social Media App - Mitram

[\[Watch Demo\]](#)

Tech Stack: React.js, Django, HTML, CSS

A full-stack social platform inspired by Facebook/Instagram enabling user interaction and content sharing.

- Developed reusable React components and integrated them with Django REST APIs.

- Built backend models and endpoints for user authentication, posts, likes and save features.
- Implemented React hooks for state management and dynamic user interactions.
- Designed and tested frontend interfaces to ensure smooth user experience across devices.
- Enabled CRUD operations for posts and profiles, enhancing user engagement

News Website

Tech Stack: *Django, Django REST Framework, Bootstrap, HTML, CSS*

A dynamic news portal with categorized articles, admin dashboard, and community engagement.

- Built REST APIs to manage news articles, categories, and user interactions.
- Developed admin dashboard for publishing and managing content efficiently.
- Implemented search, filter, and comment functionality to enhance user navigation.
- Designed responsive UI using Bootstrap for desktop and mobile devices.
- Focused on robust backend logic to ensure reliability and scalability.

CERTIFICATIONS

- **Python and Django Professional Training** – January 9th, 2025
Broadway Infosys (2.5 months)
- **ReactJS for Beginners** – *Simplilearn* – June 27th, 2025
- **Currently expanding knowledge in full-stack development (React + Django integration).**

EXPERIENCE

Python & Django Intern – Verisk Nepal *(Feb 2024 – Mar 2024)*

- Selected through a competitive process for a Python & Django Internship.
- Collaborated in initial project setup and gained exposure to real-world development workflows.

EDUCATION

- **Bachelor of Information Technology (BIT), Tribhuvan University** – *Present*
Bhaktapur Multiple Campus, Nepal (Present – 8th (Final) semester)
- **High School (+2 Level) – Khwopa Secondary School, Nepal** – *2021*
GPA: 3.62 (**Grade 12**),
GPA: 4.00 – (**Grade 11**)
